

8-OUTLET SURGE PROTECTOR

8-outlet, 2 satellite pair and Ethernet surge protector with RJ45 2xDSS – satellite signal protection, both transmit and receive, 4 of 8 electrical outlets designed for oversize transformer type A/C adapters.

Cable modem, failure status indicator lights – surge and ground.

Rotary safety covers for each of the 8 outlets.

POWER PROTECTION FOR HIGH SPEED SATELLITE, MODEM AND COMPUTER NETWORK COMPONENTS

This new offering provides the best surge protection available. This state of the art intricate electronic circuitry encased in rugged ABS housing provides the highest surge ratings with superior features to protect connected electronic equipment.

FEATURES:

10-year, \$25,000 connected equipment warranty
Warranty claim hotline number: 1-800 426-2826

joules rating 1050

8 A/C outlets, 15 AMP/120 volt – 1800 watt total

Ethernet RJ45 Protection, protects against backdoor power disturbances

Satellite, Cable, Coaxial protection

EMI & RFI noise reduction

Red/Green protection status indication (Surge and Grounded)

on/off switch (with Circuit breaker)

6 foot 15 AMP/120 volt electrical cord

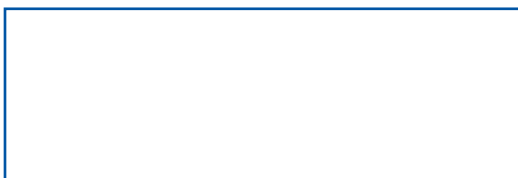

1 each 6' RJ45 Ethernet cable added to each package

UL/cUL approved

Suggested Retail
\$99.95

8-OUTLET SURGE PROTECTOR

High quality components and superior manufacturing insure supreme protection for your valuable equipment, Power spikes and voltage fluctuations are surprisingly common and seriously damage expensive equipment and permanently areas data. Protect against this threat with the Surge Protector Series.

Power Shut Down Protection : No surge protector lasts forever! This surge suppressor has a light indicating that the surge suppressor is protecting your equipment. If the light is not on, then the surge suppressor is no longer capable of absorbing spikes and should be replaced.

Joules : The number of joules determines the amount of energy that the Surge Protector can absorb. Therefore, the higher the joules, the longer your surge protector will last.

SPECIFICATIONS:

Electrical rating : 125V, 60Hz, 15A, 1875W

Energy dissipation : (8x20 μ s waveform)

Joules rating : 1050Joules

Max. Peak pulse current : 195,00Amps

Max. Surge clamping voltage : 330V

Max. Surge pluse voltage : 6000V

Responses time : faster than 1 nanosecond

EMI / RFI noise filtering : up to 20dB from 150KHz to 30MHz

Overload protection : 125V 15A circuit breaker

WARNING:

For indoor use and dry locations only. Not intended for use with aquarium equipment.

CAUTION:

Combined amp load on all the outlets at any one time must not exceed 1875Watts. In case of overloading, the circuit breaker will safely shut off all power, Eliminate overload then reset by pressing circuit breaker button.
